LIVER PROBLEMS, INJURIES FROM A FALL, LEG SPRAIN, BABY AFFECTED BY HIGH FEVER, DIABETES, HIGH BLOOD PRESSURE AND STROKE

236

A friend introduced Longevitology to me. Upon completing the 6 day elementary and intermediate Longevitology classes, I joined as a volunteer at the Seri Setia adjustment centre.

Liver problem

Practicing Longevitology has brought me a lot of benefits. I had a serious liver problem. To my surprise, the doctor told me that there is no medication or prescription for my liver problem. I did not give up hope. Instead, I kept on practicing Longevitology meditation daily, as well as volunteering at the Seri Setia adjustment centre, 3 times a week. In addition, I take Chinese traditional herbs. Now, I am recuperating marvelously.

Injuries from a fall and leg sprain

One day, my husband and I went to the wet market, I slipped and fell down. It was too painful to get up from the

floor. Fortunately, my husband was there to provide emergency adjustment on chakra 7 and my heart. After this, I managed to get up, even though my whole body was still aching. Although I was still in pain, I went to the adjustment centre, the same evening, to provide adjustment for other patients. Miraculously, after doing adjustment for others my pains were gone.

Baby affected by fever

Baby Jia Ern had a high fever when she was three months old. Ever since, she could not turn to her side. She was eight month old when I first met her, yet she could not crawl and had cross eyes. I adjusted for her everyday. There was great improvement after two months. Now, she has become more alert and active.

Diabetes, high blood pressure and stroke

A policeman who was suffering from diabetes and high blood pressure had a stroke and was in coma for ten days. A group of volunteers from Seri Setia adjustment centre provide adjustment for him. He showed much improvement after our third adjustment. Even his doctor was amazed by the speed of his recovery and wondered what he had been doing. He told the doctor that he had some kind of therapy. The doctor approved it and advised him to continue with it.

Conclusion

I am very grateful that I had the opportunity to learn Longevitology, and would like to thank all our teachers who put in so much effort to pass the knowledge to us, especially to teacher Lin Tzu Chen.
