

Emergency first aid

In October 2006 , I had the chance to render emergency first aid (C7 & heart) together with my husband and youngest son (C5, C4 and lungs) while we were trapped in a faulty lift in Low Yat Plaza for half an hour. The lift suddenly tumbled down with great force. There were around 19 of us cramped in the small lift and ventilation was poor and it was during the fasting month. This stranger (a Malay gentleman in his mid 30's) was about to pass out/faint. I assured him that I had learnt natural healing by directing and channeling the universal energy without monetary gain, religion and politics involved. After adjusting him for 15 minutes, he informed us that he was feeling alright but we adjusted him until help arrived.

Illness of Spiritual nature (Pseudo mental illness)

At our Serdang Centre, we had a special case involving unseen beings/spirits. The first time I and another volunteer adjusted her, once my hand was placed on her C7 & heart, she immediately responded with non-stop loud barking sounds even after adjustments ended. This barking was very loud, fierce and terrifying that most volunteers were afraid to adjust her. On her third visit, I confirmed that she had been bothered by the spirits on top of her heart and breathing problem. She was afraid that she would not be adjusted for the above condition. I told her to persevere and assure that it is my responsibility to help her because I had personally gone through nightmares and disturbances from the spirits since childhood. Initially, my hands, shoulders, neck and elbows were very numb, tired, and painful during and after adjusting her because I had to hold her body weight (due to her constant struggling) alone most of the time as nobody dare to adjust her and adjustment was done in a separate section of the centre in

order not to distract other patients. After several adjustments, her barking got more intense and terrifying at times. With my true sincere and compassionate heart, the spirit was willing to listen to my advices and instructions. I managed to communicate with the spirit through her nodding or shaking her head and I had to guess all the way through. At times she was in a complete trance-like state. I encouraged her to learn Longevity in Gua Musang in October 2006. In Gua Musang our teacher from Taiwan Mr. Chai, I and a few others adjusted her daily and it was a guessing and jigsaw puzzle game. Teacher Chai and I had to do a lot of counseling on compassion, forgiveness, repentance, letting go to her and the spirit. The spirit that had bothered her for more than 10 years promised to leave her body on the last day of the class. Presently she appeared normal during adjustments despite of some soft burping sound due to wind and negative thoughts and depression of many years and she is still physically feeling tired.

Severe depression

Case 1:

Somewhere, in January 2007, my youngest brother was suffering from sudden onset of severe depression. His faced was pale, very yellow and he looked completely blank, distressed and very depressed. With the assistance of one of my fellow Longevity sister, we adjusted his C7, C6, medulla oblongata and whole head for 3 hours. After the adjustment, he looked normal and regained his consciousness and appetite. With several times of adjustments, advice from his doctor, counseling from us and prayers performed by Honorable Ven. Dhammaratana, he is now feeling better.
