

Case 2:

My friend and her husband had learnt Longevity in July 2006. Her husband was suffering from severe depression (bi-polar disorder) for several years and was on medication for 2-3 years without any improvements. Initially, she was quite an ardent volunteer. However, after completing her senior class in December 2006, she stopped practicing Longevity completely due to hectic lifestyle and lack of confidence. Somewhere in August 2007, I was told that her husband was admitted to hospital due to inhalation of poisonous gas (carbon monoxide) for more than 10 hours. Subsequently, he suffered from serious brain damage especially in his medulla oblongata, left vocal cords and throat, lungs were damaged too. He was unable to talk, eat and drink, movements restricted, unable to sleep, had headache, possess peculiar behavior and became a recluse. Upon his discharged from the Lumut military hospital, we managed to persuade him to be adjusted by us in his house. We (four of us) adjusted his Chakra 7 and 6, medulla oblongata, Chakra 5 and throat, lungs, heart (with great emphasis), liver, stomach and other parts of his body for more than one hour. During adjustments, we counseled him, shared our personal life experiences with him and encouraged him to treasure life. After the adjustment, he looked more alert, cheerful, cooperative and gained more confidence in Longevity and was amazed at the effectiveness. We did another two subsequent adjustments in his house. On 4th September 2007, he willingly came to our adjustment centre. Due to his condition, we try our best to assist him to recover by showering him with love, care, patience and devotion. Now he is able to eat and drink, able to sleep well, talk, movements improved and his overall conditions had greatly improved. He is no longer on medication for his bi-polar disorder.

Chronic tonsillitis with constant high fever, swollen painful lips

My youngest son is 13 years old and he had a long standing chronic tonsillitis problem with constant high fever since 2 years old. He had to observe a very strict diet of no fried/heaty, cold/ice foods and drinks to prevent any occurrence of high fever. He is not very cooperative and always resisting during adjustments. My priority is to adjust his C7, throat, C5 and whenever there is available time I will also adjust all other chakras, medulla oblongata, kidneys and whole back. Presently he doesn't need to observe a too strict diet rules and he is no longer on traditional Chinese medicine and averted the operation to remove his tonsils. I am still doing adjustments for him daily.

In September 2006, my son fell down in school and hurt his lips, elbows and knees. Upon reaching home he was unable to eat due to swollen painful lips. I adjusted his C7 and lips for about 15 minutes and the pain was gone and he could take his dinner.

Burnt hand – DatukTang See Hang

Somewhere in March/April 2007, Datuk Tang See Hang was severely burnt at his hand (2nd degree) and arm due to explosion from the hydrogen filled balloons while he was gracing an opening ceremony event in a Tamil school in Rawang. He was admitted to the Burn unit (Restricted Zone and we have to observe strict rules before entering his room). His hand and arm was in cast and I noticed that he was suffering in severe pain and discomforts despite of being on morphine medication prescribed by his doctor. Together with brother Niu, sister Amy (Mrs Niu), my husband and myself, we adjusted his C7, C5, his whole hand, C4, C3, C2, C6, heart, lungs, kidneys, stomach and liver for an hour. After the adjustment he told us that he felt great relief and his pain and discomfort were
