When I was young, had to cope with work as well as housework, busy at either ends. Now retired, with lots of minor ailments, through the friends' recommendation, began to learn Longevityology. Seeing the love and help of everyone, caring shown between each other, this unconditional warmth, making my well being a lot better.

After learning Longevityology, because my sister's daughter has a tumour in the pancreas and needs to have an operation in the hospital and on hearing, the Longevityology volunteer is advice, if adjustments have been applied to the sufferer before and after the operation, it would help the sufferer to reduce pain after the operation. . After my sister and I hear this, together with the volunteer, three of us applied adjustments for my niece. As true, my niece had the operation, did not need any injection for pain. Even the nurse asked her: you do not need the injection for pain. My niece was very brave; Longevityology is certainly wonderful, certainly very effective.

I myself suffering from dry eyes, whenever I feel uncomfortable, would apply adjustments to myself, it is also very effective. Whenever family members or friends has cold and cough, I would immediately help them with adjustments to back, chest and C5 chakras, they would gradually feel better, no more coughing!

Longevityology is really so good to use, very quick to see the results, everyone please make good use of it.

Symptoms and adjustments : Operation pain – C7 + affected area.

Dry eyes – C7 + eyes.

Cough – C7 + C5 +airway.
