Was involved in a car accident and injured the left leg, and unable to lift my hands, been treated with Chinese medicine for 8 months before it is all healed. Also running a business, when it gets busy, I get nervous, very often my heart starting to beat very fast, feels very uncomfortable. Then, through a friend's recommendation, from the beginning I was holding the thought of just try to see, very sceptical, together with my friend and learned Longevityology. The first day had the chakras opened, the next day felt my left knee was very painful, just as well a volunteer sitting next to me, and I requested help with adjustments, for about 30 minutes, the next day I did not feel the pain in the leg, it's really amazing, unbelievable. After the intermediate course completed, whenever I have time, I put my hand on the heart area, slowly I could feel the heart beat not increasing.

My son suffers from allergic sinusitis, every day as soon as he gets up, he starts sneezing, runny nose, which is my most troublesome headache. After learning Longevityology, I often apply adjustments for him, now he is much better, no more sneezing or runny nose. Very thankful to my friend and Longevityology!

Symptoms and adjustments : Painful knee – C7 + affected area.
Sinusitis – C7 + C5 + affected areas.
