

Mother's heartbeat returned to normal.

Learner : Ms. Cheung

Address : Taipei County, Lonhau

Tel: +886-920876092

I have suffered from peptic ulcer before; my digestive system is not so good, the rest of the body seems normal. While attending the primary and intermediate courses, had chakras opened, felt my mouth and tongue so dried, the body was a bit warm, otherwise, no other uncomfortable feelings.

Learning Longevity, my initial thought was to help my mother, she had malignant tumour. At that time, she had no hair, I have been applying adjustments for her frequently, and her hair is growing quite fast. During the process of adjustments, she could feel the top of her head gradually getting warm, her body also feel warm, and my palm to the back of the hand also feel warm. Apart from that, as I had peptic ulcer before, so when I am applying adjustments to mother, my stomach would feel as though air bubbles bubbling inside. Even though mother is seriously ill, having irregular heartbeats, after I applied adjustments for her for 2 days, each day for 5 to 6 hours, each time for at least one hour or more, and her heartbeats back to normal.

With Longevity I continue to apply adjustments to the sufferer every day, and seeing the obvious results, making me have more confidence to help people with adjustments for a better health.

Symptoms and adjustments : Loss of hair – C5 + whole head.
Peptic ulcer – C3 + stomach.
Irregular heartbeats – C4 + heart.
Tumour – C7 + C6 + C5 + C4 + C3 + C2 + tumour area.
