

Numbness and pain in hand reduced, eye symptoms disappeared.

Learner : Ms. Yong

Address : Taipei city, Chungshan district.

Tel: +886-2-25054781

Every human being would grow old, all the organs, skin and bones would degenerate, and growing old, learning Longevity would improve the state of the organs, skin and bones with adjustments.

My left hand and palm was numb and painful, the first day of the course, after chakras opened by the teacher, the left hand was feeling hot. Through self-adjustments and go to the treatment centre, apply adjustments to each other with the volunteers, after a month or so, the numbness and pain in the left hand has reduced. After completing the intermediate course, the right eyeball felt as if something inside like the noise of broken glass, very uncomfortable. Immediately I placed on C7 and one hand on C6 and the whole eye area to treat myself, after one week or so, the symptoms disappeared; but the left eye started to have the same symptoms, therefore continued with adjustments to C7, C6 and the whole eye area. After that, even when sleeping I place my hands on C7 and C6 and covered the eyes. I like to look beautiful, teacher Lin said put both hands on the abdomen, one on each side, then you will look beautiful, I follow the instructions. For osteoporosis and loin area pain, place both hands on the back of the loin area. Been to the treatment centre and helped the volunteers with adjustments, they all said my hands are lovely and warm, feel very comfortable. When I apply adjustments to one particular volunteer for her head and heart, my hands felt very hot, the volunteer said her chest felt like boiling. When I apply self-adjustments, doing exercises, my hands would get very hot.

Learning Longevity, able to treat myself, and help people with adjustments, continue until you feel comfortable.

Symptoms and adjustments : Numbness and pain in hand – C7 + neck area +
affected area.

Eyes symptoms – C7 + C6 + eyes.
