

Directly from doing exercises and the adjustments of Longevity, my own health and my daughter's sinusitis condition got a lot better, my good friend with cancer is making good progress, looking well generally. I often tell my relatives and friends the goodness of Longevity, hope there is a chance, they could also learn about Longevity.

While practicing in the treatment centre, seeing many volunteers, with their loving hearts, everyday coming to the treatment centre and help many ill people with adjustments. This kind of unconditional giving, no reward is necessary, and their good spirit make people admired. I believe Longevity is able to help people, also able to increase own power, able to keep well and healthy, one act with multi-purposes, hoping Longevity's benevolence and compassion, saving people, this wonderful spirit would last forever.

Symptoms and adjustments : Sinusitis – C7 + nose.
