

Cerebral bleeding due to car accident, with no complications.

Learner : Mr. Sit

Address: Taipei county, Tucheng city

Tel: +886-2-22659009

Time really flies, 48 years old already! As aging process grows along with time, day by day the bodily functions slow down. In May last year, it felt like frost on top of the snow (an expression), involved in a severe car accident, sustained multiple injuries in the arms and legs. Then in mid July, was taken to the hospital in emergency by my wife due to cerebral bleeding, had the operation the same day, after two weeks in the hospital, was able to go home for convalescence. At that time, my mother had just completed the intermediate course of “Longevityology”. While recovering at home, mother would apply adjustments for me several times a day, together with medications, slowly and safely I recovered, did not have any side effects or complications as the medical doctor informed might appear, really thank goodness!

Further, more, my father was ill and in hospital receiving treatment. Just as well, my mother has completed the advance course of Longevityology. Every day mother would apply adjustments several times together with the help of volunteers, father recovered sooner than expected, he noticed that he had grown new hair on top of his head – that is a bit of miracle.

Symptoms and adjustments : Cerebral bleeding – C7 reinforce head.

Baldness – C7, C5 reinforce head.
