

the patient was also taking Chinese medicine, even eating and drinking organic foodstuff, but I believe the universal energy of Longevityology is the main factor that improved her condition!

Case no.3 : I have a client who has a chronic nasal inflammation, for a long time her nose always feel blocked, even more so in winter influenza season, together with headache makes it worse. I shared with her the knowledge of Longevityology, she seems very interested, then I arranged to meet her in the treatment centre in Taipei. The volunteer placed one hand on C7, one hand on the nose, then the head and throat area, after the adjustments, my client said she had been to the washroom to blow her nose, a thick yellowish secretion came out, immediately the feeling of heavy head has gone, normally her hands are cold, now her hands are warmer than mine, she feels that is unbelievable.

Case no.4 : Because of too much pressure from work for the past week, not sleeping well at night. Went to the treatment centre and requested help from the volunteer. He placed one hand on C7, one hand on the back of my head, then behind the left ear; with emphasis on C5, C4, after 1 hour of treatment, he asked me if I had any feelings, I said my head feels expanded, very mixed up in the body and could not sit down properly, then he said do not give yourself too much pressure, do not think too much, and relax. When the adjustments finished, the feelings headaches, giddiness have disappeared, gradually feeling well, had a good sleep that night until next morning, it is wonderful.

I truly feel teacher Lin is a great and benevolent person, a lot of people after learning Longevityology, not only helping themselves, but also helping others. This is the vision of teacher Lin, hoping everybody spreading Longevityology, everybody would benefit from it, with better health, and naturally, people do not have to visit the doctors, reduce the cost of medical expenses. I do feel teacher Lin has done unmeasureable good deeds, and through learning Longevityology, I saw and realised in our society, there are many kind-hearted people, after learning Longevityology, quietly go and help people in need.

Lastly, I like to thank Longevityology, it makes me realised the power of the body, heart and soul, in fact it is a kind of energy of love, when this energy of love has been sent out, and when people received this energy of love, they do not only found health back in the body, the mode of the heart and soul also raised.
