“Longevity” helped me to eradicate the horrible “Cancer”.

I am a very ordinary housewife, with some intelligence, never fight with anyone. I have a healthy and good figure, people used to praise me the same, I was proud of myself. My life routine, every Monday, Wednesday and Friday mountain climbing, Tuesday, Thursday and Saturday local dancing, being doing the same for so many years. After I graduated, I was teaching for 6 years, after I got married and gave up the job, at home looking after husband and teaching children, very happy and harmonious life. My husband Lin Shek Ming was the best husband under the sky, if you gentlemen not agree, you can compare your good deeds with my husband, you all surely would feel inferior, I am so thankful to heaven given me such valuable gift. I have raised 2 sons and 2 daughters, they are all good and obedient children. All are doing well with accomplishments, produced a beautiful picture of a happy family

Good life does not last, an unfortunate event happened. In the beginning of August 1996, my husband got an incurable disease “Liver Cancer”, he was so sick in bed for 87 days; I never left the hospital a single step. My children had given up their jobs, some got leaves from work, all took turn to look after father, still not able to save my husband’s life, on the 6th of November, he said goodbye to the world. Made me suddenly lost my dependence, desperately helpless, for many times just wanted to follow him and died. However, I pulled myself together, made arrangements for his funeral, and within 100 days of his death, arranged my youngest son’s wedding ceremony, to satisfy my husband’s soul in heaven.

The same year 1996, by chance I had the opportunity to learn about Longevity, at that time I was just half believe and half-doubtful. I thought the principle foundation of Longevity, if it cannot cure disease; at least it helps the body to become stronger. Was still painful with the lost of my husband, every day went to the Tucheng treatment centre of Longevity, requested help from the volunteers to treat my dry eyes, from there I met Mr. Yau (Yau grandpa we used to call him), he still helps me with adjustments. Dry eye – Keratoconjunctivitis sicca – there was no treatment with conventional medicine, every day I had to instill artificial eye drops to keep the eye moist. I never expected within half year,
