All the bones in my body aches, especially the back and the shoulder, so painful that could not get to sleep at night. In the beginning of April 2008, through a friend's recommendation, began to learn about Longevityology, and then participated in primary and intermediate courses. Amazing! Through practice and treatment, shoulder not painful anymore, the other pains are less frequent, especially when I am tired, after meditation, would feel 100% better.

One day, my niece brought her daughter to my house, the little girl has allergy problem, and my husband immediately applied adjustments for her. Afterward, the little girl said her nose been unblocked, her nose felt much well, my niece's family are going to learn Longevityology. In our spare time, my husband and I would go to the treatment centre to practice. The manager of the treatment centre is very sincere to people, all the volunteers are very friendly, very eager to teach, make us feel not afraid any more. Once we were applying adjustments to each other, the person sitting in front of me, had a lump on the right side of his back which was noticeable, after treatment, the lump has gone, the back is flat, I saw it with my own eyes, so unbelievable.

Longevityology is simple and easy to learn, able to self-help, also able to help other people kind of exercises. Any person only have to continue practice, work with other people, step by step learning to achieve a better result, to correct own self body and health condition. There is no limitation or restrictions in Longevityology, at any time and in any place, one can enable self to practice and apply adjustments, it is good for young and old.

Symptoms and adjustments : Sinusitis – C7 + C5 + affected area.

Shoulder pain – C7 + affected area.
