

My family's nobleman.

Learner : Ms. Chou

Address : Taipei city, Sungshan district.

Tel: yulichou@livemail.tw

The learner's health condition is relatively good, very pleased that had the opportunity to come across the "Longevityology". Hoping having learned "Longevityology" to keep fit and healthy, and as a result to be able to help more people, to get rid of bodily aches and pains. At the same time, to share the logic of "Longevityology" with relatives and friends, to encourage more friends to participate.

The learner joined the primary and intermediate courses, while having the chakras opened, experienced a strange feeling, difficult to describe. While attending classes and receiving adjustments from volunteers, also have reactions, especially the stomach area, sometimes uncomfortable and now feel much better. In the process of applying adjustments to relatives and friends, from their reaction the learner could feel they are responding to the healing. Learner's son, all along been suffering from severe nasal sinusitis, after learning "Longevityology", everyday I apply adjustments for him for half an hour, although unable to see the immediate effect, but it has improved over a period of time, the sensitivities has decreased..

The learner's daughter has been suffering from epileptic fits, headaches, and giddiness and vomiting sickness etc. Since 16th August, everyday attend "Loving Heart" treatment centre in Taipei, having treatment from all the volunteers, also having treatment at home, all her ills and pains gradually got better. Up to now, having had treatment over a month, to have all these improvements, the whole family feel very happy. It is a relatively short period since the learner learned "Longevityology", need to work harder, practice, and practice, hoping to have the chance to participate and join the advance course, to be able to help more people to get rid of the ills and pains. "Longevityology" is my family's nobleman. Thank you to all the teachers and volunteers.

Symptoms and adjustments : Sinusitis – C7 + C5 + nose.

Epileptic fits – C7 + C6 + whole head.

Vomiting sickness – C3 + stomach area and heart area.
