Ten years ago, diagnosed (inner ear water imbalance), medical term “Meniere’s disease), every day in the company of medications. As the age advancing, bodily strength also not like before, the frequency of sudden attack of vertigo increased, even fall down, my quality of life suffered.

The last 2 years, due to the same condition had another fall, once I broke the bone in the arm, other time broke the leg bone, and each time takes two months to heal. During this period, my children already completed the advance course of Longevityology, every day they apply adjustments for me, in my heart I am not sure whether I believe just by using both hands would be able to heal the disease, or it is the problem of my own body unable to sit for long, felt no results achieved. Recently had another fall, only sustained minor injury, this might be the opportunity fallen on me, I felt that this time I recovered especially quickly. From that time onward, my confidence grown a lot, everyday I make time for adjustments. Unbelievable, not only the pain from the past broken bone injuries, or the aches and pains of the old ailments, and the problems of weaken legs, all gradually improved.

While in this surrounding, family members encouraged me to join and learn Longevityology. After the primary and intermediate courses and the opening of the chakras, felt the body’s energy is increasing drop by drop. During practice period, every time no matter it is the volunteer applying adjustments for me, or I myself applying adjustments for other people, always feel a kind of hot, numb feeling, from slightly and gradually increased, this is the feeling of power of energy getting strong, it really make one feel unthinkable!

Although, due to my age is advancing, and poor bodily strength, there is not way I could satisfy the requirement of the course work completely. But I hope with the advance course learning and practicing, to make myself to achieve more, I also hope that when my body’s energy and power increased, and able to extend my hands, to contribute my small share of energy for other people’s health.

Very grateful indeed! Thanks to Longevityology for the generous giving and service to all!
