Hello! Everybody well, I am so and so, before learning Longevity, I have been suffering from sinusitis, every night not able to sleep, every morning going to school unwell. In addition, everyday have to use 2 boxes of tissues, unable to breathe in and out, life so difficult.

Since I had the chakras opened and sitting quietly/ meditating, my sinusitis is getting better slowly. Also I had injuries and bleed a lot, I immediately placed one hand on C7 and one hand on injured area, after a few minutes, the bleeding stopped, I am very glad. A week after the intermediate course completed, I went to do voluntary work for a few days, and I wish that people who have time in the evening would go and learn Longevity.

It happened once, I was riding a bicycle and carelessly had a fall grazed the skin, very painful, but grand pa immediately applied adjustments for me, the painful area got better very quickly. From that time on, anyone in the family who has pain, this small volunteer would appear, so I manage all the injuries and pains for the family members.

Symptoms and adjustments : Sinusitis – C7 + C5 + affected area.

Injury – C7 + affected area.
