

Sister-in-law had an operation, applied adjustments to help her to pass flatus.

Learner : Ms. Chan

Address : Taipei County, Panchiao city

Tel: +886-2-29651516

Over ten years ago, came across Longevity because of grandfather had cirrhosis of the liver. Before I had the chakras opened, my eyes felt uncomfortable and asked mother to apply adjustments for me, and then felt better and brighter. Last year because of high school examination, could not go to join the course with my cousin, this year I went with my sister to join the primary and intermediate courses in Panchiao district. The second day of the Chinese New Year went with mother to Macho Temple and made offerings, because of bad air ventilation, made me feeling giddy, nearly fainted, nobody offered help. Mother carried me to the door, started using Longevity, placed one hand on C7 and one hand on the heart, at that time an elderly man said he also had learned Longevity and able to help us, this made me feel, for whoever learned Longevity would have this loving heart!

My elder sister-in-law was taken to the hospital because of abdominal pain, found out she had ruptured of the ovarian cyst. Mother and I went to visit her, the sister-in-law felt very uncomfortable because she could not pass flatus, the wound was painful, and so mother and I together applied adjustments, one hand on C7, one hand on C3, with emphasis on the wound site. During the process, she passed a lot of flatus, that made her felt very comfortable and the wound was less painful. That was the first time I applied adjustments to help, I felt just extending both hands, and able to help people, now I know the happiness of helping other people.

Thank you to all the uncles and aunties in the Panchiao treatment centre, made me understood more wonders of Longevity. After the chakras opened, I never thought of just extending both hands and able to help people, also help myself, but my biggest wish is to attend advance course, and make myself grow a bit taller. Thank you to teacher Lin and teacher Wei.

Symptoms and adjustments : Faint – C7 + C4 + heart.

Abdominal wound – C7 + C3 + C2 + affected area.
