

Abnormal liver functions for 7 years, now it is back to normal.

Learner : Ms. Lin

Address : Taipei, Manshan

Tel: +886-2-22308619

My general health is good, but the liver functions showed the GOT, GPT above normal range for 7 years. After the chakras opened, the obvious reaction is sleeping better, right through until next day light, also the speed of micturition become quicker, with larger quantity.

Because of work, not able to go to the treatment centre for adjustments. Therefore, I make use of the morning hours, sitting quietly and apply adjustments to self. Recently had a health check up, noticed that the liver enzymes GOT, GPT range have returned to normal, this made me pleased, because I have not been taking medications. I think this should be the result of daily practice of Longevityology.

I have been applying adjustments for my daughter lately, she was suffering from a bad flu, and she felt it has reduced the nasal congestion and poor appetite symptoms, thank you to Longevityology.

Symptoms and adjustments : Flu – C7 + C5 + nose + throat.
Abnormal liver function – C7 + liver.
